ARNOLD, ERNST V

ART UNIT

PAPER NUMBER

1616

MAIL DATE

DELIVERY MODE

04/07/2008

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/647,501	Applicant(s) ALLENSPACH ET AL.	
	Examiner ERNST V. ARNOLD	Art Unit 1616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 January 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-29 is/are pending in the application.
- 4a) Of the above claim(s) 24-29 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/7/08 has been entered.

The restriction requirement filed on 8/4/06 remains in force.

Claims 1-29 are pending in the application. Claims 24-29 are withdrawn from consideration as being drawn to non-elected subject matter. Claims 1-23 are under examination as they read upon the elected subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 remain/are rejected under 35 U.S.C. 102(a) and 35 U.S.C. 102(e) as being anticipated by Nadkarni et al. (US 2002/0013357 Pub. Date: 01/31/2002).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

Art Unit: 1616

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Nadkarni et al. disclose pharmaceutical compositions containing from about 1 mg to about 100 mg of valdecoxib useful in treatment of cyclooxygenase-2-mediated conditions and disorders (Abstract). Nadkarni et al. disclose that the tablet compositions contain pregelatinized starch (National Starch 1500: a **corn starch**) in the same amount, 20 mg, as the instant application (Page 8, Tables 1 and 2 and claims 1, 4, 6 and 7). Applicant teaches the same pregelatinized starch in the tablet (instant specification, page 21 Table 1). It is the Examiner's position that since the same pregelatinized starches are taught in the same amount then the tablet disclosed by Nadkarni et al. would have low viscosity and/or exhibit a multimodal particle size distribution and read on instant claims 1-6, 17 and 19. Nadkarni et al. disclose valdecoxib particles have a D_{90} less than about 75 μm (Claim 9) and can be present from about 4 mg to about 40 mg per dose and reads on instant claims 7 and 8 (Claim 4). Nadkarni et al. disclose a tablet wherein the excipients comprise one or more diluents in an amount of about 5% to about 99%, one or more disintegrants in an amount of about 0.2% to about 30%, one or more binding agents, starch, is present in an amount of about 0.5% to about 25%, and one or more lubricants in an amount of about 0.1% to about 10%, by weight of the composition thus anticipating instant claims 20-22 (Claim 5). Nadkarni et al. disclose a tablet wherein the excipients comprise lactose monohydrate, microcrystalline cellulose, croscarmellose sodium, pregelatinized starch and magnesium stearate thus anticipated instant claim 23 (Claim 7).

Instant claims 9-17 are directed to shear stress values for the pregelatinized starch. Since the disclosure of Nadkarni et al. teaches the exact same pregelatinized starch in the exact same amount as the instant application, then it is the Examiner's position, without evidence to the contrary, that the pregelatinized starch of the disclosure of Nadkarni et al. inherently has those properties. Please note that the Office is not equipped with the proper equipment to test the myriad number of ways an Applicant might measure a variable. When the prior art appears to disclose the same exact components in the same amounts then the burden is shifted to Applicant to demonstrate the difference.

With respect to the USC 102 rejection above, please note that in product-by-process claims, "once a product appearing to be substantially identical is found and a 35 U.S.C. 102 rejection [is] made, the burden shifts to the applicant to show an unobvious difference." MPEP 2113. This rejection under 35 U.S.C. 102 is proper because the "patentability of a product does not depend on its method of production." In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985). In addition, please note that the Patent and Trademark Office is not equipped to conduct experimentation in order to determine whether Applicants' pregelatinized starch differs and, if so, to what extent, from that of the discussed reference.

Response to arguments:

Applicant asserts that the cited references do not disclose selection of the pregelatinized starch on the basis of determination of low viscosity and/or a particle size test. The claim as currently amended now reads on a product by process. As stated above, the patentability of the product does not depend on its method of production. The Examiner has found a product made with pregelatinized starch. It is noted that Applicant is also using Starch 1500 supplied by

Colorcon (page 21, table 1 [0081]). It appears as if Nadkarni et al. and Applicant are using the same corn starch.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 remain/are rejected under 35 U.S.C. 102(b) as being anticipated by Nadkarni et al. (WO 01/41761 A2).

Nadkarni et al. disclose pharmaceutical compositions containing from about 1 mg to about 100 mg of valdecoxib useful in treatment of cyclooxygenase-2-mediated conditions and disorders (Abstract). Nadkarni et al. disclose that the tablet compositions contain pregelatinized starch (National Starch 1500: a **corn starch**) in the same amount, 20 mg, as the instant application (Page 21, Table 1 and claims 1, 4, 6 and 7). Applicant teaches the same pregelatinized starch in the tablet (instant specification, page 21 Table 1). It is the Examiner's position that since the same pregelatinized starches are taught in the same amount then the tablet disclosed by Nadkarni et al. would have low viscosity and/or exhibit a multimodal particle size distribution and read on instant claims 1-6, 17 and 19. Nadkarni et al. disclose valdecoxib particles have a D₉₀ less than about 75 µm (Claim 9) and can be present from about 4 mg to about 40 mg per dose and reads on instant claims 7 and 8 (Claim 4). Nadkarni et al. disclose a

Art Unit: 1616

tablet wherein the excipients comprise one or more diluents in an amount of about 5% to about 99%, one or more disintegrants in an amount of about 0.2% to about 30%, one or more binding agents, starch, is present in an amount of about 0.5% to about 25%, and one or more lubricants in an amount of about 0.1% to about 10%, by weight of the composition thus anticipating instant claims 20-22 (Claim 5). Nadkarni et al. disclose a tablet wherein the excipients comprise lactose monohydrate, microcrystalline cellulose, croscarmellose sodium, pregelatinized starch and magnesium stearate thus anticipated instant claim 23 (Claim 7).

Instant claims 9-17 are directed to shear stress values for the pregelatinized starch. Since the disclosure of Nadkarni et al. teaches the exact same pregelatinized starch in the exact same amount as the instant application, then it is the Examiner's position, without evidence to the contrary, that the pregelatinized starch of the disclosure of Nadkarni et al. inherently has those properties. Please note that the Office is not equipped with the proper equipment to test the myriad number of ways an Applicant might measure a variable. When the prior art appears to disclose the same exact components in the same amounts then the burden is shifted to Applicant to demonstrate the difference.

With respect to the USC 102/ rejection above, please note that in product-by-process claims, "once a product appearing to be substantially identical is found and a 35 U.S.C. 102 rejection [is] made, the burden shifts to the applicant to show an unobvious difference." MPEP 2113. This rejection under 35 U.S.C. 102 is proper because the "patentability of a product does not depend on its method of production." In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985). In addition, please note that the Patent and Trademark Office is not equipped to conduct

Art Unit: 1616

experimentation in order to determine whether Applicants' pregelatinized starch differs and, if so, to what extent, from that of the discussed reference.

Response to arguments:

Applicant asserts that the cited references do not disclose selection of the pregelatinized starch on the basis of determination of low viscosity and/or a particle size test. The claim as currently amended now reads on a product by process. As stated above, the patentability of the product does not depend on its method of production. The Examiner has found a product made with pregelatinized starch. It is noted that Applicant is also using Starch 1500 supplied by Colorcon (page 21, table 1 [0081]). It appears as if Nadkarni et al. and Applicant are using the same corn starch.

Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernst V. Arnold whose telephone number is 571-272-8509. The examiner can normally be reached on M-F (6:15 am-3:45 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
